

Actual Data Sheet

No.LS-7

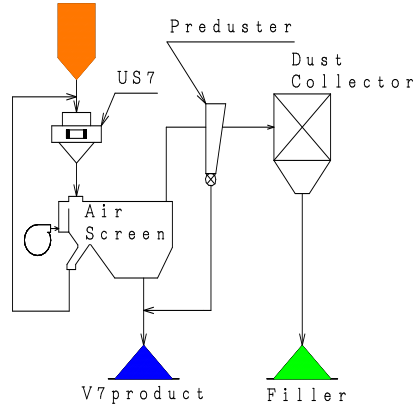

- Customer : Nittetsu kogyo "Shiriyu" <Shinnittetsu Group> (No.39)
- Model : V7-100

US7	US7-636H(55m/s)
Air Screen	AS3900
Preduster	PD1200
Dust collection	1350m ³ /min

- Date : Nov-2006
- Rock type : Limestone
- Yield ratio & Production Volume

This company is producing very high quality sand and specifically for the construction of atomic power stations to the standard Jass5N. All Kemco's competitors were unable to make such a sand using a dry system. But we have been able to do so with amazing success. They have been working so smoothly without any trouble at all in the heaviest snow and strongest winds in the North of Japan.

	Raw material	V7 product	Filler
Yield ratio	100t/h	76.1t/h	23.9t/h
Production Volume	100%	76.1%	23.9%
